CE-Konformitätserklärung / Declaration of CE-Conformity Déclaration de conformité CE / Dichiarazione di conformità CE / CE-Declaración de conformidad

Hersteller / manufacturer / fabricant / produttore / fabricante: Tintometer GmbH / Schleefstraße 8-12 / 44287 Dortmund / Deutschland

Produktname / Product name / Nom du fabricant / Nome del prodotto / Nombre del productor: MD 200

- EG-Konformitätserklärung gemäß RICHTLINIE 2004/108/EG DES EUROPÄISCHEN PARLAMENTS UND DES RATES vom 15. Dezember 2004 und RICHTLINIE 2011/65/EU DES EUROPÄISCHEN PARLAMENTS UND DES RATES vom 8. Juni 2011. Der Hersteller erklärt, dass dieses Produkt die Anforderungen der folgenden Produktfamiliennorm erfüllt:
- Declaration of EC-Conformity according to DIRECTIVE **2004/108/EC** OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 2004, December the 15th and DIRECTIVE **2011/65/EU** OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 2011, June the 8th. The manufacturer declares that this product meets the requirements of the following product family standard:
- FR

 Déclaration de conformité CE conformément à la DIRECTIVE 2004/108/CE DU PARLEMENT EUROPÉEN ET DU CONSEIL du 15 décembre 2004 et DIRECTIVE 2011/65/UE DU PARLEMENT EUROPÉEN ET DU CONSEIL du 8 juin 2011. La fabricant déclare que le produit est conforme aux exigences de la norme de famille de produits suivante :
- Dichiarazione di conformità CE in conformità alla DIRETTIVA 2004/108/CE DEL PARLAMENTO EUROPEO E DEL CONSIGLIO del 15 dicembre 2004 e DIRETTIVA 2011/65/UE DEL PARLAMENTO EUROPEO E DEL CONSIGLIO del 8 Giugno 2011. Il produttore dichiara che il seguente prodotto soddisfa i requisiti della seguente norma per famiglia di prodotti:
- CE Declaración de conformidad conforme a la NORMA 2004/108/CE DEL PARLAMENTO Y DEL CONSEJO EUROPEO del 15 de diciembre de 2004 y NORMA 2011/65/UE DEL PARLAMENTO Y DEL CONSEJO EUROPEO del 8 de junio de 2011. El fabricante declara, que este producto cumple con las exigencias de la siguiente norma correspondiente a la familia de productos:

DIN EN 61326-1:2006

- Störfestigkeit entsprechend den Anforderungen für Geräte für den Gebrauch in industriellen Bereichen (Tabelle 2) / Störaussendungen gemäß den Anforderungen für Geräte der Klasse B
- Immunity test requirements for equipment intended for use in industrial locations (Table 2) / Emission according to the requirements for class B equipment
- Immunité conformément aux exigences applicables aux appareils destinés à une utilisation dans le domaine industriel (tableau 2) / Émissions parasites conformément aux exigences applicables aux appareils de la classe B
- Resistenza alle interferenze in conformità ai requisiti per i dispositivi destinati all'uso in ambito industriale (Tabella 2) / Emissione in conformità ai requisiti per i dispositivi della classe B
- Resistencia a interferencias correspondiente a las exigencias para aparatos de uso en áreas industriales (gráfica 2) / Emisión de interferencias conforme a las exigencias para aparatos de clase B

Dortmund, 07.10.2014

Cay-Peter Voss, Managing Director

Important disposal instructions for batteries and accumulators

EC Guideline 2006/66/EC requires users to return all used and worn-out batteries and accumulators. They must not be disposed of in normal domestic waste. Because our products include batteries and accumulators in the delivery package our advice is as follows:

Used batteries and accumulators are not items of domestic waste. They must be disposed of in a proper manner. Your local authority may have a disposal facility; alternatively you can hand them in at any shop selling batteries and accumulators. You can also return them to the company which supplied them to you; the company is obliged to accept them.

Important Information

To Preserve, Protect and Improve the Quality of the Environment Disposal of Electrical Equipment in the European Union

Because of the European Directive 2012/19/EU your electrical instrument must not be disposed of with normal household waste!

Tintometer GmbH will dispose of your electrical instrument in a professional and environmentally responsible manner. This service, **excluding the cost of transportation** is free of charge. This service only applies to electrical instruments purchased after 13th August 2005. Send your electrical Tintometer instruments for disposal freight prepaid to your supplier.

GB Functional description – General notes

Display backlight

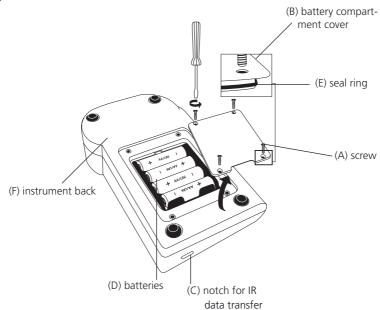

Press the [!] key to turn the display backlight on or off. The backlight is switched off automatically during the measurement.

Recall of stored data

If the instrument is switched on, press the [!] key for more than 4 seconds, then release the [!] key to access the recall menu.

Replacement of batteries:

CAUTION:

To ensure that the instrument is water proof:

- seal ring (E) must be in position
- battery compartment cover (B) must be fixed with the four screws

If the batteries are removed for more than one minute the date and time menu starts automatically when the photometer is switched on the next time.

GB General notes

Method notes

- Prior to measurement ensure that the sample is suitable for analysis (no major interference) and does not require any preparation i.e. pH adjustment, filtration etc.
- Different Refill Packs available on request.
- Reagents are designed for use in chemical analysis only and should be kept well out of the reach of children.
- Ensure proper disposal of reagent solutions.
- Material Safety Data Sheets: available on request. (Internet: www.lovibond.com)

Chemical method notes:

Method:

The organic material present in the sample is oxidised by a standard amount of a potassium dichromate oxidising mixture. After oxidation is complete, the excess of this reagent is measured photometrically.

Application:

Samples can be measured if the chloride content does not exceed 1000 mg/l (LR/MR) or 10 000 mg/l (HR).

In exceptional cases, compounds contained in the water cannot be oxidized adequate. This results in minimum findings, compared with the reference method.

Different methods of sampling, preparation of the sample itself and the time elapsed between taking the sample and analysis can all affect the obtained results.

GB Methods

COD vario

Select the appropriate vial for the desired range:

Reagent		Form of reagent/Quantity	Order-No.	
CSB VARIO LR	0 - 150 mg/l	1 Set (25 tests)	2420720	
CSB VARIO MR		1 Set (25 tests)	2420721	
CSB VARIO HR	0 - 15000 mg/l	1 Set (25 tests)	2420722	

Preparing the Sample

Open a reaction vial with a white cap and add the specified volume. (Ensure that appropriate personnel safety equipment is used.)

LR-/MR: 2 ml water sample HR: 0.2 ml water sample

Prepare a **blank** (Note 1) by using deionised water (TOC-free) instead of the sample (LR/MR: 2 ml, HR: 0.2 ml).

Replace the cap **tightly**. Invert the vial gently several times to mix the contents **(The vial will become hot during mixing!)** and digest the vials for **120 minutes** in the reactor at a temperature of **150°C**. Remove the vials from the reactor and allow them to cool down to 60°C or less. Mix the contents by inverting each vial several times while still warm. Then allow the vials to cool to ambient temperature before measuring.

Measurement

Fix the adapter for 16 mm vials on the sample chamber.

Switch the unit on using the [ON/OFF] key.

The display shows the following:

Select the required test using the [MODE] key.

Scroll Memory (SM)

To avoid unnecessary scrolling for the required test range, the instrument memorizes the last range used before being switched off. When the instrument is switched on again, the scroll list comes up with the last used test range first.

RANGE

The display shows the following:

Place the **blank** in the adapter (Note 1–4) making sure that the marks $\overline{\chi}$ are aligned.

Blanks are specially prepared for each individual test range.

Press the [ZERO/TEST] key.

The "Range" symbol flashes for approx. 8 seconds.

GB Methods

0.0.0

The display shows the following:

After zeroing remove the vial from the adapter.

Place the **sample** in the adapter (Note 2–4) making sure that the marks $\overline{\chi}$ are aligned.

Press the [ZERO/TEST] key.

The "Range" symbol flashes for approx. 3 seconds.

The result appears in the display.

LR-/MR-range: in mg/l HR-range: in **g/l**

The result is saved automatically.

Tolerance: ± 3.5 % (full scale)

Repeating the test:

Press the [ZERO/TEST] key again.

New zero calibration:

Press the [ZERO/TEST] key for 2 seconds.

Guidelines for photometric measurements

- Run samples and blanks with the same batch of vials.
 The blank is stable when stored in the dark and can be used for further measurements with vials from the same batch.
- 2. Don't place hot vials in the adapter. Allow the vials to cool to room temperature for minimum 45 minutes. It is recommended to leave the vials to cool over night.
- Suspended solids in the vial lead to incorrect measurements. For this reason it is important to place the vials carefully in the adapter. The precipitant at the bottom of the sample should not be suspended.
- 4. Clean the outside of the vials with a towel to remove fingerprints or other marks.
- 5. Avoid spillage of water or reagent solution into the sample chamber because this can lead to incorrect test results.
- 6. Contamination of the transparent cell chamber can result in wrong readings. Check at regular intervals and if necessary clean the transparent cell chamber using a moist cloth or cotton buds.
- 7. Large temperature differences between the instrument and the environment can lead to errors e.g. due to the formation of condensation in the cell chamber or on the vial.
- 8. To avoid errors caused by stray light do not use the instrument in bright sunlight.

GB Menu options

Press the [MODE] key and hold.

Switch the unit on using the [ON/OFF] key.

Allow the 3 decimal points to be displayed before releasing the [MODE] key.

▲ diS recall stored data

▲ Prt printing stored data

▲ ♥ setting the date and time

user calibration

The selected menu is indicated by an arrow in the display.

A diS - Recall of stored data

After confirming the selection with the [MODE] key the photometer shows the last 16 data sets in the following format (automatically proceeds every 3 seconds until result is displayed):

Number n xx (xx: 16...1)

Year YYYY (e.g. 2014)

mm.dd (monthmonth:dayday) Date Time hh:mm (hourhour:minuteminute)

Range Range Result X,XX

The [ZERO/TEST] key repeats the current data set.

The [MODE] key scrolls through all stored data sets.

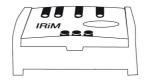

Quit the menu by pressing [!] key.

A Prt – Transmitting stored data (to Printer or PC)

Note: To print data, or to transmit to a PC, the optional IRiM (Infrared Interface Module) is required.

GB Menu options

PrtG

The IRiM Module and the connected printer/PC must be ready. Press the [MODE] key to start the transmitting, the instrument displays "PrtG" (Printing) for approx. 1 second followed by the number of the first data set and its transmission. All data sets will be transmitted one after the other. After finishing the instrument switches to test mode.

The print job can be cancelled by pressing the [On/Off] key. The instrument switches off.

E 132

If the instrument is not able to communicate with the IRiM, a timeout occurs after approx. 2 minutes. The error E 132 is displayed for approx. 4 seconds. Subsequently, the instrument switches to test mode (see also IRiM manual).

▲ V Setting date and time (24-hour-format)

After confirming the selection with the [MODE] key the value to be edited will be shown for 2 sec

The setting starts with the year (YYYY) followed by the actual value to be edited. The same applies for month (mm), day (dd), hour (hh) and minutes (mm). Set the minutes first in steps of 10, press the [!] key to continue setting the minutes in steps of 1.

Increase the value by pressing the [MODE] key.

Decrease the value by pressing [ZERO/TEST] key.

Proceed to the next value to be edited by pressing [!] key.

After setting the minutes and pressing the [!] key the display will show "IS SET" and the instrument returns to the measurement mode.

GB Calibration Mode

User calibration

Note:

cAL
CAL

user calibration (Display in calibration mode)

factory calibration (Display in calibration mode)

CAL LR

After confirming the selection with the [MODE] key the instrument will show CAL/LR.

Scroll through ranges using the [MODE] key.

Place the **blank** in the adapter making sure that the marks $\overline{\chi}$ are aligned.

CAL

Press the [ZERO/TEST] key.

The "Range" symbol flashes for approx. 8 seconds.

The display shows the following in alternating mode:

Perform measurement with a standard of known concentration as described.

Press the [ZERO/TEST] key.

The "Range" symbol flashes for approx. 3 seconds.

The result is shown in the display, alternating with CAL.

If the reading corresponds with the value of the calibration standard (within the specified tolerance), exit calibration mode by pressing the [ON/OFF] key.

Changing the displayed value:

Pressing the [MODE] key once increases the displayed value by 1 digit.

Pressing the [ZERO/TEST] key once decreases the displayed value by 1 digit.

Press the corresponding key until the reading equals the value of the calibration standard

By pressing the [ON/OFF] key, the new correction factor is calculated and stored in the user calibration software

Confirmation of calibration (3 seconds).

Note: Seperate calibration of the measuring range for HR is not possible. The unit uses the calibration for the MR measuring range.

GB Calibration Mode

Factory calibration reset

Resetting the user calibration to the original factory calibration will reset all methods and ranges.

A user calibrated method is indicated by an arrow while the test result is displayed.

To reset the calibration press both the [MODE] and [ZERO/TEST] key and hold.

Switch the unit on using the [ON/OFF] key. Release the [MODE] and [ZERO/TEST] keys after approx. 1 second.

The following messages will appear in turn on the display:

The factory setting is active. (SEL stands for Select)

or:

Calibration has been set by the user.

(If the user calibration is to be retained, switch the unit off using the [ON/OFF] key).

Calibration is reset to the factory setting by pressing the [MODE] key.

CAL

The following messages will appear in turn on the display:

Switch the unit off using the [ON/OFF] key.

MD200 7 07/2016

GB Technical Data

Technical Data

Instrument double wavelength, automatic wavelength selection,

direct reading colorimeter

Light source: LEDs, interference filters (IF) and photosensor in transparent

cell chamber. Wavelength specifications of the IF:

430 nm $\Delta \lambda = 5$ nm 610 nm $\Delta \lambda = 6$ nm

Wavelength accuracy $\pm 1 \text{ nm}$

Photometric accuracy* $3\% FS (T = 20^{\circ} C - 25^{\circ} C)$

Photometric resolution 0.01 A

Power supply 4 batteries (AA/LR6)

Operating time 53hr operating time or 15000 test measurements in continuous

mode when display backlight is off

Auto-OFF automatic switch off

10 minutes after last keypress

Display backlit LCD (on keypress)

Storage internal ring memory for 16 data sets

Interface IR interface for data transfer

Time real time clock und date

Calibration user and factory calibration

resetting to factory calibration possible

Dimensions $190 \times 110 \times 55 \text{ mm (LxWxH)}$ Weight approx. 455 g (incl. batteries)

Ambient conditions temperature: 5-40°C

rel. humidity: 30-90 % (non-condensing)

Waterproof as defined in IP 68 (1 hour at 0.1 meter); floatable instrument

To ensure maximum accuracy of test results, always use the reagent systems supplied by the instrument manufacturer.

^{*}measured with standard solutions

GB Operating messages – Error codes

Operating messages

Hi	Measuring range exceeded or excessive turbidity.
Lo	Result below the lowest limit of the measuring range.
	Replace batteries, no further tests possible.
btLo	Battery capacity is too low for the display backlight; measurement is still possible.
Store Date	

A user calibrated method is indicated by an arrow while the test result is displayed (see "Factory calibration reset").

Frror codes

	Erro	r codes	
E27/E28/E29	Light absorption too great. Reasons: e.g. dirty optics.
