

At TRILITY we make it our business
to understand and support yours

Through our people, our systems, our service

TRILITY plays a vital role in our modern world by providing water, wastewater and environmental solutions which contribute to a better quality of life.

TRILITY is involved in the delivery of 100s of water infrastructure projects, currently servicing over 450 facilities. We have extensive operations, spanning from the far south of Tasmania to the most northern tip of the country and across the Tasman.

Today, our business combines many services, solutions, products and applications to suit each client's needs. We continually pivot to keep pace with rapidly evolving technology, markets, regulations and climate conditions.

TRILITY is committed to be a 'partner of choice' in the delivery of water, wastewater and environmental services.

Today our combined services consist of;

- asset management
- finance
- project design and construction
- data analytics
- operations and maintenance
- water quality management
- modular solutions
- spare parts supply
- servicing
- training
- consultancy services

We manage numerous water infrastructure assets across Australia and New Zealand using best practice management systems and processes. We use the latest technology to design, build, install and operate modular water and wastewater treatment solutions. TRILITY specifically tailors solutions to meet the various water treatment challenges faced by the water sector today.

TRILITY has been built around our strengths. We are front line operators and service technicians supported by a dedicated group of water quality professionals. Together we deliver safe and efficient water and wastewater services, with a vision to be the most respected in our field.

Our solutions and services are built on our heritage and our expertise, a dedication to do it right, and a passionate commitment to provide our services effectively, efficiently, safely and responsibly.

Our competitive advantage lies within our specialised teams and services, as well as our relationships with local sub-contractors, consultants and suppliers. We work alongside our clients, as partners to optimise facilities, processes and performance - creating value through the full water and wastewater cycle, enhancing competitiveness and protecting the environment.

TRILITY's capabilities ensure the critical infrastructure we manage operates at - or above - contractual compliance and builds on the Company's excellent environmental record.

What is TRILITY?

An Australian and New Zealand company committed to being the 'partner of choice' in the delivery of water and environmental services.

Understanding the TRILITY way

From Managing Director Francois Gouws

At TRILITY our expertise adds value everyday – to our customers, shareholders and stakeholders across Australia and New Zealand. The value of our Company is the sum of our employees and the expertise they bring to every customer focused solution.

For each of our employees, the process of adding value begins on day one at TRILITY. We employ only the best talent whose expertise provides flexible and scalable technology solutions to meet the specific needs of each client and the ever changing operational conditions, environment and expectations of the communities and industries we serve.

What emerges within the TRILITY employee base is an expertise and knowledge that ensures we deliver a service that exceeds our clients' corporate objectives, be they cost savings, improved performance or environmental compliance.

TRILITY's clients know our employees will deliver beyond the expected levels of service. They understand the outcome will be built on collaboration, experience and the right application of resources and innovation.

Our engineering, commercial, project, operational, management, customer service, communications and financial experts guarantee you exceptional project delivery and standards of service. Our professional water and environmental services enable communities to grow existing businesses and attract new ones.

We are an Australian and New Zealand company with strong international financial backing that is committed to being the 'partner of choice' when it comes to water and environmental service delivery.

We thank you for your interest in TRILITY and look forward to sharing the TRILITY story with you.

Francois Gouws
Managing Director

What we value

Integrity

At the core of the TRILITY business is a commitment to integrity. We are responsible and respectful of our natural environment. We seek constructive engagement with clients, governments and every community in which we operate.

Progressive

We are progressive in our thinking as we balance desirability with technical feasibility and economic viability.

Commitment

TRILITY's focus is always long term. As investors with lengthy commitments to our projects, we understand the requirements and needs of asset owners.

"TRILITY's clients know our employees will deliver beyond the expected levels of service. They understand the outcome will be built on collaboration, experience, the application of the right resources and innovation."

How can we help you?

TRILITY has the professional expertise and experience to undertake all challenges across the full cycle of water use – from designing, building, operating and maintaining desalination plants to delivering potable water, establishment of wastewater treatment plants and purpose-built modular solutions. Supported by our front-line operators, service technicians and dedicated group of water quality professionals; together we deliver safe and efficient water and wastewater services, with a vision to be the most respected in our field.

Asset management

At TRILITY we deliver asset management expertise to projects in the resource, utilities and municipal sectors. We manage numerous water infrastructure assets across Australia and New Zealand using best practice management systems and processes. Our approach to asset management and operations is unified and consistent.

Modular solutions

We use the latest technology to design, build, install and operate modular water and wastewater treatment solutions. TRILITY specifically tailors modular solutions to meet our clients' various water treatment challenges. We do this in partnership with a range of clients covering the utilities, municipal, resources and industrial sectors.

Operations

We are front line operators delivering safe and efficient water and wastewater services, with a vision to be the most respected water operators in Australia and New Zealand. We work in collaboration with our clients to manage, operate, and maintain water and wastewater infrastructure for urban and regional communities. TRILITY has been a market leader in operating water infrastructure since 1991. Our expertise flows from our team of qualified operators and process engineers whose diverse range of knowledge, skills, and experience makes our people experts in their field. Our capabilities enable us to deliver a broad range of services and safe drinking water 24 hours a day.

Network services

Our commitment

Our approach is built on respect, underpinned by our strategic insight and our excellence in performance culture to deliver maximum value. We believe success comes from the commitment of our people in developing and deploying the best technology, and building long-lasting relationships.

Projects

TRILITY provides project delivery services covering the municipal, agricultural, resources, and industrial sectors. We have robust experience and expertise in delivering the best possible solution across projects of differing sizes and complexity to ensure we exceed our clients' expectations. Our competitive advantage lies within our multi-disciplined engineering and procurement specialists, as well as our relationships with local sub-contractors, consultants, and suppliers.

Servicing

To ensure optimum service life and performance of your water treatment equipment, TRILITY provides preventative servicing, valve maintenance, and seized valve release to 100's of facilities. We are committed to providing high standards of in-field service, and maintain equipment across many industries including municipal, resources and recreation. We do this through our national team of specialised Service Technicians.

Water quality

Our expertise encompasses 'smart' water services, leadership in source water management, and compliance to the Australian Drinking Water Guidelines and environmental standards. TRILITY's water quality and process support teams are a dedicated group of professionals providing a broad range of services to our clients and the communities in which we serve.

Through our consultancy services, our goal is to ensure our clients can support consistent and sustained operations that meet Australian regulatory and public health standards and protect the environment.

We are committed to optimising the efficiency and performance of our client's water treatment plants and creating a consistent quality of water for communities across Australia.

Western Australia

- 1

58 Mile tank chloramination facility*
The Water Corporation of Western Australia had a requirement to upgrade the 58 Mile tank facility to meet their current standards. TRILITY was awarded the contract for the manufacture of the chlorine and ammonia dosing modules, as well as the civil site works installation, commissioning and project management.
- 2

Allanooka chlorination reconfiguration *
Allanooka is a gas chlorination plant that disinfects the groundwater from a borefield that supplies Geraldton, a major regional city of north of Perth. TRILITY was contracted to reconfigure the chlorination system.
- 3

Electrochlorination supply of facilities*
TRILITY was involved the design, manufacture and commissioning of an electrochlorination system to replace the existing system. The on-site generation of sodium hypochlorite reduces safety handling issues due to not having to deliver the chemical to site.
- 4

Mine Site Water Treatment*
TRILITY was commissioned by one of the largest mineral resource companies in Australia to design, manufacture and commission a multi-stage water treatment system. The system was specifically designed to provide their sites with water that complied with the Australian Drinking Water Guidelines.
- 5

Mundaring Water Treatment Project
TRILITY, as part of the Helena Water consortium financed, designed, constructed, commissioned and through a Joint Venture now operates the 165 ML/d Mundaring Water Treatment Plant and Mundaring Pump Station C in Western Australia.
- 6

Neerabup groundwater treatment plant upgrade*
The Neerabup groundwater treatment plant used to treat 100ML of groundwater a day for supply to Perth's integrated water supply scheme. TRILITY was contracted to increase treatment capacity to 150ML/day.

Northern Territory

- 7

Energy Resources of Australia Limited Water Treatment Operations Support*
TRILITY provided operational advice and support for Energy Resources of Australia reverse osmosis plant which treated mine site water for subsequent process reuse and environmental discharges.

South Australia

- 8

Adelaide Desalination Plant
TRILITY is a Joint Venture partner in AdelaideAqua Pty Ltd, the entity which has an agreement with SA Water to operate and maintain the plant until 2033.
- 9

Berri Barmera Reuse Scheme
TRILITY designed, built, financed and operates the wastewater treatment and reuse scheme for the Berri-Barmera Council in Australia's Riverland.
- 10

Adelaide Hills Community Waste Management Scheme
TRILITY operates and maintains the Birdwood Wastewater Treatment Plant for the Adelaide Hills Council.
- 11

Onkaparinga Wastewater Treatment Plant
TRILITY in partnership with the City of Onkaparinga, has redeveloped the city's Septic Tank Effluent Disposal Schemes to enable the water to be used for the irrigation of vineyards in the McLaren Vale and Willunga regions.
- 12

Riverland Water Project
TRILITY is the operator for Riverland Water, a consortium that designed and built 10 water treatments plants in regional South Australia. Located mainly along the banks of the River Murray, the plants serve approximately 150,000 people living in more than 90 communities.
- 13

Victor Harbor Wastewater Treatment Plant
TRILITY designed, built, and operates a wastewater treatment facility to treat sewage effluent to log six virus removal standard, making it suitable for unrestricted irrigation of private residence, community parklands, and golf courses. TRILITY designed and constructed the plant enhancement, which the client financed.
- 14

Virginia Pipeline Scheme*
The Virginia Pipeline Scheme was operated and maintained by TRILITY. The scheme provided sustainable water infrastructure. Virginia Pipeline Scheme in South Australia provides 20GL per year of recycled water to more than 360 customers.
- 15

Waikerie Wastewater Scheme
TRILITY designed, built, operates and maintains under a 20 year contract, a wastewater treatment and reuse facility for the District Council of Loxton Waikerie in South Australia.
- 16

Wakefield Regional Council community wastewater management scheme (CWMS)
TRILITY has been awarded a three-year contract by Wakefield Regional Council to operate and maintain the CWMS, with plants located at Balaklava, Blyth, Hamley Bridge, Port Wakefield, and Snowtown.

Victoria

- 17 Ararat Water Treatment Plant***

Design and construction of an upgraded fluoride dosing system to comply with the updated Code of Practice for the fluoridation of drinking water supplies.
- 18 Barwon Water Biosolids Management Project**

TRILITY operates and maintains Australia's largest thermal drying biosolids facility, servicing the Barwon Water service region. The facility places TRILITY, Plenary Environment, and Barwon Water at the forefront of responsible biosolids management in Australia.
- 19 Campaspe Asset Management Services (CAMS)***

TRILITY in collaboration with Coliban Water managed, maintained and operated over 46 reservoirs and water storage basins across north central Victoria, which provided water and wastewater services to urban and regional customers across 49 towns.
- 20 Campaspe Water Reclamation Scheme**

TRILITY operates the Campaspe Water Reclamation Scheme, a sustainable reuse scheme providing benefits to local industry. Campaspe Water Reclamation Scheme is one of the first projects in Victoria to treat 100 percent of wastewater generated by a community in the towns of Echuca and Rochester.
- 21 Eastern Irrigation Scheme**

The scheme operated by TRILITY delivers 5GL per year of Class A recycled water to farming, recreational, industrial and residential customers around Cranbourne in Melbourne.
- 22 Grampians Water Operations and Maintenance**

TRILITY operates four water treatment plants in the western Victorian townships of Ararat, Great Western, Halls Gap, and Stawell under an existing 25-year agreement with Grampians Wimmera Mallee Water in western Victoria.
- 23 Mount Zero Powdered Activated Carbon (PAC) Dosing System***

Improving water taste and odour using powdered activated carbon dosing prior to treatment at Mount Zero Water Treatment Plant.
- 24 Soluble iron removal***

TRILITY was engaged by a leading Victorian tree nursery to design and manufacture a water treatment solution to remove soluble iron from the nursery's raw bore water.
- 25 South East Water Disinfection Contract***

TRILITY was contracted to operate and maintain South East Water's booster chlorination and residual monitoring chlorination facilities for three years.

- 26 Yan Yean Water Treatment Plant***

TRILITY designed, built and financed the 155 ML/d Yan Yean Water Treatment Plant and they were the sole operator under contract to Melbourne Water.
- 27 Yarra Park Water Recycling Facility**

TRILITY operates the Yarra Park Water Recycling Facility under a 3-year operations and maintenance contract with the Melbourne Cricket Club, located within Yarra Park, the parkland adjacent to the Melbourne Cricket Ground.

Tasmania

- 28 TasWater Regional Towns Water Supply Program***

TasWater selected TRILITY to design and construct Work Package One of the TasWater Regional Towns Water Supply Program. The project covered the design and construction of water treatment plants and the subsequent operational support for eight of sixteen townships around Tasmania.
- 29 TasWater Scamander Network***

TRILITY was engaged to provide a top up chlorination solution in the Scamander reticulation system and assist with maintaining chlorine residual levels across the network.
- 30 TasWater UV Project (Stage 1)***

TasWater engaged TRILITY to design and construct ultraviolet ('UV') upgrades for nine water treatment plants as part of a state-wide initiative to ensure all Water Treatment Plants provide the necessary level of treatment to meet the state's Health-Based Targets.
- 31 Wayatinah Remote Reservoir Chlorine Control***

TRILITY designed a purpose built sodium hypochlorite modular solution which was used in conjunction with the Hydra-Mix in tank mixing and monitoring device to control the chlorine levels in the reservoir.

New South Wales

Queensland

New Zealand

New South Wales

- 
32 Macarthur Water Filtration Plant
 TRILITY is partnering with Sydney Water to achieve long-term desirable financed water treatment solutions. The scope includes the Design, Build, Finance, the 35-year Operation and Maintenance of the facilities, and plant upgrade to ensure it continues to deliver high-quality drinking water.
- 
33 Wentworth to Broken Hill (W2BH) Pipeline
 TRILITY is a Joint Venture (JV) partner in the W2BH O&M which operates and maintains the Wentworth to Broken Hill pipeline.

Queensland

- 
34 Agnes Water and Seventeen Seventy Integrated Water Project
 TRILITY was contracted by Gladstone Regional Council to provide a new wastewater treatment facility, desalination plant and subsequent ultrafiltration system upgrade for the towns of Agnes Water and Seventeen Seventy.
- 
35 Alligator Creek chlorine dosing system*
 TRILITY designed, supplied and installed a pre-fabricated gas chlorination system to replace the existing sodium hypochlorite system at Alligator Creek to provide increased consistency of disinfection and to reduce disinfection by-products.
- 
36 Aratula and Helidon Sewage Treatment Plant free water surface wetlands*
 Queensland Urban Utilities commissioned TRILITY and our major subcontractor, Water and Carbon Group, to Design and Construct treatment plant upgrades at Aratula STP and Helidon STP.
- 
37 Brisbane Airport Corporation Water Quality Improvement Project*
 The Brisbane Airport Corporation engaged TRILITY to deliver a solution to maintain optimal disinfection residual throughout their water supply network.
- 
38 Lion Co. Australia Wastewater Recycling Plant*
 TRILITY partnered with Lion Co. Australia to commission and operate an affordable and environmentally sound water recycling plant at Lion's Brewery in Milton, Brisbane.
- 
39 Northern Peninsula Area Water Supply System*
 TRILITY operated and maintained the water treatment plant and provision of potable water to five indigenous communities within Bamaga and the Northern Peninsula Area.

- 
40 Redcliffe Sewage Treatment Plant*
 TRILITY was selected by Unitywater to deliver the Design, Build, Operate and Maintain contract for the rehabilitation of the Redcliffe Sewage Treatment Plant in South East Queensland.
- 
41 Seqwater Field Operations and Maintenance Services*
 TRILITY, in a Joint Venture, operated and maintained the bulk water transport network throughout South-East Queensland under an operations and maintenance contract with its client Seqwater.

- 
42 Townsville City Council Water Supply Upgrade Project
 TRILITY has upgraded an existing 232 ML/d water treatment plant and constructed a new 40 ML/d plant at Townsville and operates both facilities under a 20 year contract to provide long-term water security.
- 
43 Yabulu Reuse Plant*
 TRILITY designed, built, operated and maintained for ten years under an alliance agreement, a wastewater treatment facility to treat saline industrial wastewater generated during nickel refining at the Yabulu Nickel Refinery in Townsville for reuse in refinery operations.

New Zealand

Hawke's Bay Region

- 
44 Hawke's Bay District Health Board Main Water Supply and Treatment System*
 TRILITY was engaged to design and build a modular water treatment plant at the Fallen Soldiers' Memorial Hospital in Hastings that is capable of providing 1.3 ML/d of compliant drinking water.

Northland

- 
45 Mangawhai Community Wastewater Scheme*
 Mangawhai Community Wastewater Scheme was operated for the Kaipara District Council in New Zealand. The scheme included the operations of the Mangawhai wastewater treatment plant and reuse farm which TRILITY operated.

Rotorua

- 
46 Rotorua Wastewater Services
 Rotorua Lakes Council has entered into a collaborative contract with TRILITY and its consortium to deliver wastewater services for the Rotorua district, which includes the operations, maintenance and asset management of wastewater treatment plants, land treatment system, and network maintenance and renewals.

Revelent experience

Driving growth today

TRILITY management operates plants across Australia and New Zealand treating over 1.5 GL/d and servicing millions of people everyday. Our managers and field staff offer the qualifications and experience across disciplines such as engineering, project and financial management to ensure water infrastructure is managed in an optimum way, where the safety of employees and contractors is paramount and community engagement is ongoing. Our employees use advanced technology and systems across each operation to ensure plant availability for our clients and their customers.

Excellent outcomes

At work

Our people are the reason behind TRILITY's success to date. TRILITY's depth of expertise and understanding means we know what each of our clients require in terms of asset standards, whole-of-life costs, operational performance and safety requirements.

How we behave

Safety always

Safety is at the core of our business and the communities we serve. We strictly enforce compliance with health and safety protocols at each of our construction, operating and administrative facilities. TRILITY takes the view that all incidents which impact on the health and well-being of our stakeholders are preventable. This requires each employee to take ownership in promoting workplace safety across each business unit. This is readily apparent to anyone who visits a TRILITY facility. TRILITY monitors its safety performance closely by using tools such as our OHSAS 18001-accredited Occupational Health and Safety Management System (OHSMS).

Community responsibility

TRILITY is committed to improving the communities we serve. As a supplier of essential services, we understand the impact our facilities have on the communities where we operate. This means we are focused on ensuring our employees adhere to our corporate values and commit to exemplary performance across all aspects of our footprint in the community. This runs across everything we do, from protecting the environment to supporting community organisations.

Caring for our environment

TRILITY has a demonstrated commitment to sustainable business practices across each of our construction, operating and administrative sites. This enables us to integrate sustainability targets and principles into our everyday activities and ensure we are accountable to our clients, stakeholders and in strict compliance with legislation requirements. TRILITY works in collaboration with our partners to ensure the protection of natural ecosystems around each operating site. The application of the Company's ISO 14001-accredited Environmental Management System (EMS) enables TRILITY employees to safeguard the environment. These activities are measurable and form part of the Company's broader key performance indicators. TRILITY regards continuous improvement in environmental management as a fundamental part of the Company's financial and operating performance.

Global expertise

TRILITY has a parent company - Beijing Enterprises Water Group (BEWG) - with a significant footprint across the international water industry. (As at 30 June 2023)

TRILITY, an Australian and New Zealand company, has a growing footprint with the support of its shareholders, Hong Kong listed Beijing Enterprises Water Group (BEWG), and with that comes a wealth of international experience and know-how. BEWG is a large-scale group that provides a broad range of water services to more than 33 provinces, 100 cities via more than 500 owned and operated facilities. Our Group now has an ever-stronger knowledge and skillset to bring innovation and enhanced value to both our existing and new municipal and industrial clients. Collectively we have over 20,261 employees working across the entire water value chain; assisting our clients address the challenges currently facing our sector such as water scarcity, asset preservation, and climate change. As such, our capabilities span the full life cycle of water, delivering services to millions every day.

Be a leading provider of Integrated Water Environment Services

Beijing Enterprises Water Group Limited (BEWG) is a comprehensive and leading professional water services and environmental protection services provider covering industrial investment, design, construction, operation, technical service and capital operation in full industrial chain. Its scope of business covers many fields such as water services in cities and towns, water services in river basins, industrial water services, rural water services, seawater desalination services, environmental sanitation, solid waste treatment, scientific and technical services, financial services and clean energy. It is a company listed on the Main Board of The Stock Exchange of Hong Kong Limited (one of Red Chips, Stock Code: HK 00371), and has been selected in Hong Kong's Hang Seng Index of Chinese Stocks, in Hang Seng Main China 100 Index, in Hang Seng Composite Medium Index, and in Morgan Stanley Capital International Index. Meanwhile, it is one of the first batch of experimental companies of Shanghai-Hong Kong Stock Connect.

At the Global Water Summit in 2014, BEWG was named one of the Top Four Global Water Service Companies. In 2016, its Changi NEWater Plant II in Singapore won the award of the "Water Deal of the Year". BEWG has also earned honors including "Listed Companies with Most Valuable Brand" and "Top Listed Companies with Social Responsibility".

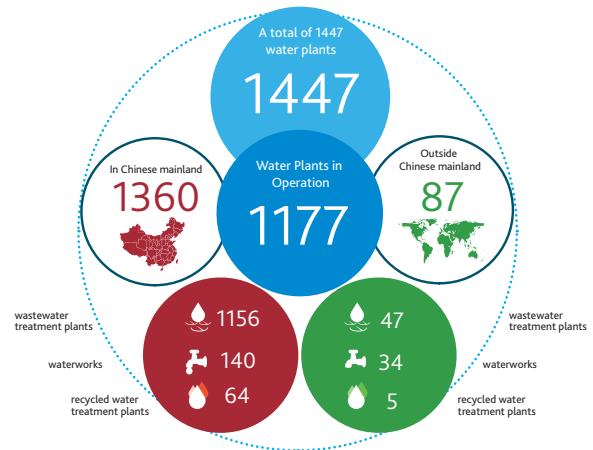

In 2018, BEWG won the "Golden Hong Kong Stocks Awards" as "Most Valuable Public Utilities and Infrastructure Company" and the "The 8th China Securities Golden Bauhinia Awards- Best CFO Award for Listed Companies". In 2019, BEWG reached the "Top Ten Influential Enterprises of Chinese Water Industry" for the ninth consecutive year; was listed among the Fortune China 500 for the fourth consecutive year; won first place among energy enterprises and small and medium-sized stocks in Hong Kong for Best ESG/SRI Data, awarded by Institutional Investors;

won the Best Environment (E) Responsibility award in the first China Enterprise ESG Golden Responsibility Awards, organised by Sina Finance.

As the significant investment and financing platform of infrastructure and public utility in Beijing, Beijing Enterprises Group owns 15 companies listed on Hong Kong Stock Exchange, such as Beijing Enterprises Holdings Limited, BEWG, Beijing Enterprises Environment Group Limited, Beijing Properties (Holdings) Limited, China Gas Holdings Ltd., and two listed A-share companies, Beijing Yanjing Brewery Co., Ltd. and Fujian Yanjing Huiquan Brewery Co., Ltd. It ranks top three in the state-owned enterprises in Beijing in terms of operation revenue, total assets and profits. It ranked the 194th among China Top 500 Enterprise Groups in 2016, and is the largest public utility enterprise in China.

In the 18th Annual Ranking conducted by Canadian media and investment research company Corporate Knights, BEWG is ranked 20th among the "Global 100 Most Sustainable Companies 2022".

2022
Celebrating 30 years

Our corporate values

The TRILITY brand is the symbol of our heritage and of the quality and trust we have delivered for the past 30 years. To our clients, it embodies a commitment to anticipate and meet their changing needs. To our organisation, it represents the imagination we use to address those needs in a manner that reflects our values.

TRILITY Reflect Reconciliation Action Plan

TRILITY is proud to present our Reflect Reconciliation Action Plan (RAP) 2021-2022. We are currently working towards our Innovation Reconciliation Action Plan which we will be launching in the second half of 2024.

Our vision for reconciliation is an Australia that embraces unity with a national culture that offers equal opportunities for Aboriginal and Torres Strait Islander peoples.

As a water and environmental business, we see our role; as supporting equitable access to clean drinking water and safeguarding the environment for Aboriginal and Torres Strait Islanders by leading the way in water and environmental services. We aim to provide equal opportunities within our business and through our business partnerships and create an inclusive and diverse workplace that is culturally safe, rich, and proud.

What is expected from TRILITY today?

It is to provide an excellent service provision to our clients now and in the future in a safe, sustainable and environmentally responsible way. It is to continuously strengthen our commitment to being the 'partner of choice' when it comes to service delivery.

TRILITY will continue to act decisively to address what matters most today and tomorrow; apply expertise and resources to deliver beyond the expected outcome; ensure a clear focus on innovation and integrity; and invest in continually improving.

Thank you
for your interest in TRILITY
