

TRILITY

Modern Slavery Statement

June 2025

Managing Director statement

At TRILITY, respecting human rights is inherent in our business operations and is embedded in our core values. We seek to treat everyone fairly and consistently, creating a workplace and business environment that is safe, ethical, open, transparent and trusted.

Preventing modern slavery practices is a complex issue with a global impact and eliminating the potential for it to occur in our operations is key to our commitment. We are also committed to working with our suppliers to identify and tackle the risks of modern slavery throughout their operations and supply chains.

This modern slavery statement reports on the steps TRILITY has taken during the period 1 January 2024 to 31 December 2025 to address the risks associated with modern slavery.

Francois Gouws
Managing Director

Reporting entity

TRILITY's core business is delivery of water, wastewater and environmental services. TRILITY is involved in the delivery of 100s of water infrastructure projects, currently servicing over 600 facilities. Our solutions are built on our heritage and our expertise, a dedication to do it right, and a passionate commitment to provide our services effectively, efficiently, safely and responsibly.

We work alongside our partners in optimising their facilities, processes and performance – creating value through the full water and wastewater cycle, enhancing their competitiveness and protecting the environment. Our approach and design principles to water management and environmental solutions use our experience, innovation and proven technology to develop a solution to suit each client's needs.

TRILITY plays a vital role in our modern world by providing water, wastewater and environmental solutions which contribute to a better quality of life for those communities we serve, across Australia and New Zealand. We have extensive operations, spanning from the far south of Tasmania to the most northern tip of the country and across the Tasman.

TRILITY has operated in Australia since 1993 and New Zealand since 2015. Previously known as United Utilities, we have a 26-year track record of delivering significant water infrastructure projects and successfully operating them for our clients. Some of our projects have included finance, design, construction, operations and maintenance as a complete service offering, making us a leader of DBFO / BOOT project delivery of water infrastructure.

We have designed, built and / or operate over 70 treatment plants in Australia and New Zealand with a combined capacity of 1,800 megalitres per day through our national workforce of approximately 300 people. These plants fall under 21 operating contracts incorporating DBFO, BOOT, DBO, D&C and O&M contract models. Several of these contracts have included financing of the project.

We have extensive operations, spanning from the far south of Tasmania to the Northern Territory and throughout New Zealand. Our business combines many services, solutions, products, and applications to suit each client's needs. We keep pace with rapidly evolving technology, markets, regulations, and climate conditions. Our solutions are built on our heritage and our expertise, a dedication to do it right, and a passionate commitment to provide our services effectively, efficiently, safely, and responsibly.

TRILITY is broadly a national company, with most of our operations in regional areas of Australia and New Zealand. TRILITY has offices in Adelaide (x2), Melbourne (x2), Gold Coast, Sunshine Coast, NSW Central Coast, Perth, Darwin and Mount Maunganui NZ (x1). TRILITY also has staff permanently based at more than 40 operational locations around Australia and New Zealand.

Corporate structure and operations

In collaboration with our clients, we provide water and environmental services to 1000's of customers

Our approach and analysis

For the current reporting period, TRILITY used the Global Slavery Index 2023 to identify industries and geographic regions which potentially present a higher risk of exposure to modern day slavery.

All suppliers of goods or services to TRILITY in both Australia and New Zealand during the 12 months to March 2025, regardless of value, have previously been categorised based on their industry and location.

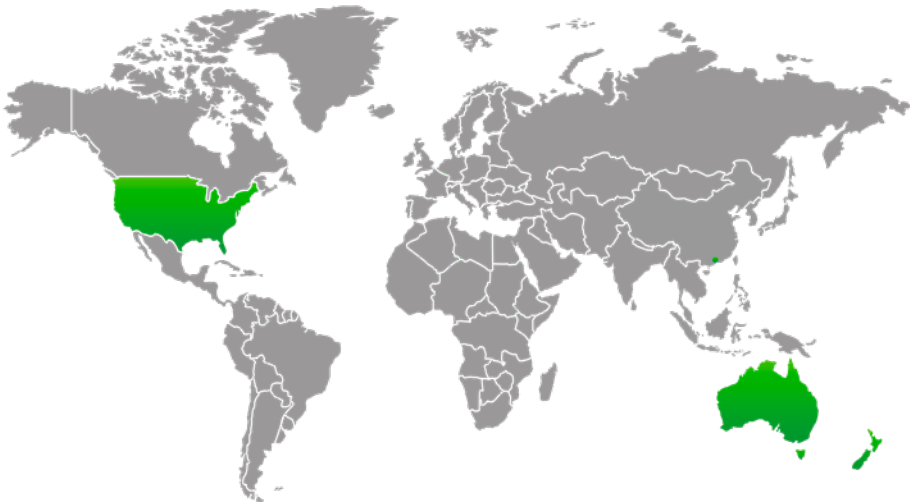

As a result of this analysis, it was found:

- 100% of TRILITY’s direct suppliers continue to be based in low-risk geographic regions

- TRILITY has reduced the percentage of goods purchased from high-risk industries (textiles and IT related equipment) from 2.9% to 2.5% and now represents just 3.19% of TRILITY’s total procurement value for the reporting period

As a result of this analysis, TRILITY’s direct exposure to modern slavery risks is considered to remain low. However, TRILITY recognises that, whilst the direct exposure may be low, indirect exposure may be different due to suppliers sourcing their products from geographic regions at higher risk. As a result, further work has been undertaken in conjunction with these suppliers to fully assess that risk (refer **actions to be taken**).

Actions taken to date	Actions to be taken	Assessing effectiveness of those actions
<p>During the current reporting period TRILITY implemented the following actions:</p> <ul style="list-style-type: none">• Discussions with the Boards of related entities which do not currently trigger the revenue threshold for reporting regarding development of an appropriate modern slavery policy• All vendors where a spend of between \$250k and \$500k were sent the TRILITY Modern Slavery assessment questionnaire• A suitable information and training package on modern slavery was identified but has not yet been implemented• TRILITY participated in a WSAA initiative to streamline vendor modern slavery data collection.• A suitable information and training package has been developed and will be rolled out to key work groups over the next 12 months• Results of returned questionnaires have been reviewed showing no further exposure to modern slavery for TRILITY	<p>During the next reporting period, TRILITY commits to assessing and implementing, where practical, the following actions:</p> <ul style="list-style-type: none">• TRILITY Modern Slavery assessment questionnaire to be sent to vendors where a spend of between \$100k and \$249k• Vendor set up and supplier assessment documentation is being reviewed and updated to include more robust questions to easily identify high-risk industries	<p>Assessing the effectiveness of TRILITY’s approach to managing the risks of modern slavery is an ongoing exercise which is achieved using the same continual improvement methods embedded in TRILITY’s ISO certified integrated management system including:</p> <ul style="list-style-type: none">• Establishing and measuring appropriate key performance indicators (e.g. training completion)• The periodic management review of TRILITY’s integrated management system, including assessment of the effectiveness of all procurement processes• Reviewing a percentage of the supplier assessments issued for responses relating to modern slavery• Internal audits

Approval

This modern slavery statement was approved by the board of TRILITY Group Pty Ltd on 11 June 2025.
The boards of other entities listed on page 4 have adopted this modern slavery statement for their operations.

Our corporate values

The TRILITY brand is the symbol of our heritage and of the quality and trust we have delivered for more than 30 years. To our clients, it embodies a commitment to anticipate and meet their changing needs. To our organisation, it represents the imagination we use to address those needs in a manner that reflects our values.

TRIsafe

Be safe because you want to,
not because you have to

What is expected from TRILITY today?

It is to provide an excellent service provision to our clients now and in the future in a safe, sustainable and environmentally responsible way. It is to continuously strengthen our commitment to being the 'partner of choice' when it comes to service delivery.

TRILITY will continue to act decisively to address what matters most today and tomorrow; apply expertise and resources to deliver beyond the expected outcome; ensure a clear focus on innovation and integrity; and invest in continually improving.

Thank you
for your interest in TRILITY
