Hydramet expands its footprint in Tasmania

The TRILITY Group is proud to announce the opening of a new Hydramet office and warehouse facility in Western Junction, Launceston.

The opening of this facility further demonstrates Hydramet and TRILITY's commitment to the Tasmanian water sector. For the past decade, we have been providing water disinfection and maintenance services. Our investment in the region by way of opening this facility and employing local knowledge is essential for our future growth in Tasmania.

The TRILITY Group prides itself on the relationships it has fostered over its 20 plus years within the water sector. It is a true testament to how well public and private sectors can work in collaboration to the benefit of the communities in which they serve. Through our facility in Launceston we intend to further build our local expertise, create employment and utilise local suppliers where possible, which we believe will provide some stimulation to the local economy.
