

Auditing chlorine site compliance to AS 2927:2001 The Storage and Handling of Liquefied Chlorine Gas. Reviewing a proposed chlorine installation design

Australian Standard AS/NZS 2927:2001 promotes the safety of persons and property where chlorine is stored or handled in its gaseous or liquefied forms, by providing requirements and recommendations that are based on industry best practices

Advisory services based on regulatory compliance and best practice

Chlorine site audits review and report on your site's adherence to the Australian Standards and regulations. The audit is based on the requirements set out in AS2927: 2001 The Storage and Handling of Liquefied Chlorine Gas and includes, but is not limited to:

Contents

- System design and construction
- Location
- Storage and handling
- Separation distances
- Access
- Operational and personnel safety
- Ventilation
- Plant safety equipment
- Emergency management
- Equipment inspection
- Personnel training
- Fire protection requirements
- First aid provisions
- Personal protective equipment
- Placarding

Our auditors are specialists in liquefied chlorine gas who produce detailed audit reports which include noted deviations from the standards and how to correct them. We also provide best practice recommendations and where permissible, cost estimates to achieve compliance.
