TRILITY SECURES A MAJOR SERVICING CONTRACT WITH TASWATER

TRILITY's Service team secures a 3-year (with extension options) UV System Maintenance Servicing contract with TasWater.

The recent award resulted from TRILITY's established presence in Tasmania and building a relationship with TasWater over the past decade. The relationship is based on previous chlorine servicing contracts, the delivery of several critical projects and the provision of operations and maintenance services for a number of water treatment plants. The predominant focus of these projects was disinfecting water supplies, including significant UV applications, supported by TRILITY's highly skilled, trade-qualified team of service technicians and active supply chain relationships with key equipment companies.

The contract covers 57 sites and 106 UV systems. TRILITY will service the contract through its dedicated team of service experts, our service team based in Launceston, and with support from our Victorian team.

Service Manager Simon Canning said, "I am very proud of my team; they have worked tirelessly to secure this contract. With the contract in place, we look forward to providing best-in-class UV System Maintenance Services and further strengthening our relationship with TasWater and the communities it serves."

TRILITY

TRILITY is an established industry leader dedicated to the delivery of water, wastewater, reuse and biosolids solutions across Australia and New Zealand's municipal and industrial sectors. This leadership draws on more than 25 years of experience in providing high-quality, environmentally sustainable solutions for our public and private sector clients.

Today, our business combines many services, solutions, products and applications to suit each client's needs. We continually pivot to keep pace with rapidly evolving technology, markets, regulations and climate conditions.

An Australian and New Zealand company with the support of its shareholders, Beijing Enterprises Water Group (BEWG), TRILITY, has a growing footprint across Australia and New Zealand. As such, our capabilities span the full life cycle of water and related services, which our dedicated team of industry specialists deliver to millions every day.
