## **TRILITY farewells the Riverland Water Project**

In December 2025, TRILITY will hand over the Operation and Maintenance of the 10 Water Treatment Plants to SA Water, upon completion of the Riverland Water Project. We sincerely thank SA Water, local suppliers, contractors, partners, and the communities with whom we have had the privilege of being involved for 26 years.

Over this period, we are very proud of the trusted partnerships we have built with the communities we serve by protecting the environment and providing reliable water and wastewater services to the people of Barmera, Berri, Loxton, Mannum, Murray Bridge, Renmark, Summit, Swan Reach, Tailem Bend, and Waikerie. This has been made possible by our TRILITY team members who reside in these towns. We will continue to uphold and deliver the same high standard of service for our ongoing contracts, including the Waikerie Wastewater, Berri Barmera Reuse, and the Adelaide Hills Community Waste Management schemes.

Adam Medlock, General Manager of Operations, said, "The Riverland Water Project has been a significant part of TRILITY's portfolio in South Australia since its inception. Collectively, we are extremely proud of the services and partnerships we have built throughout this contract, some of which will continue as we deliver the same high standard of services in our ongoing contracts in the region.

Over the years, TRILITY and its partners have proudly supported and raised vital funds for numerous community projects across the region, including the revitalisation of recreational areas and playgrounds, support for the State Theatre/Riverland Youth Theatre, local Councils' Riverland Youth Engagement programs, and school recycling initiatives. They have also helped transform facilities for child victims of domestic violence, built men's sheds, and supported families at Christmas through the region's Food Bank, among other initiatives.

TRILITY takes great pride in its team and the services delivered throughout the life of this contract and sincerely thanks its regional team for their ongoing dedication and commitment to maintaining services, especially during challenging times such as natural disasters, including bushfires and floods.

TRILITY looks forward to further strengthening its relationships across regional South Australia and to continuing to provide the same level of support and services to its remaining projects. For more details on TRILITY's projects, visit <https://trility.com.au/about-us/projects/>
